Dear Customer:

Enclosed in this package, please find Release 17.0 Production Version providing software refresh support for Client Design Change Requests along with selected bug fixes.

Version V17.0C00081 TIC = 263256

This is a Production Version build of this driver release.

Components are feature complete and there are no known issues being addressed by engineering.

Use of this software and any accompanying documentation (collectively the "Software") is subject to the terms of the Intel Software License Agreement included on this CD. By installing or using the Software, you agree to the terms of the Agreement. If you do not wish to so agree, do not install or use the Software.

If you discover any issues during your testing, please enter them into QuAD, the Question and Answer Database or contact your Intel technical representative. This will allow us to track and coordinate issues more effectively. The earlier these issues are raised, the easier they are to address in the next release. We look forward to hearing from you.

Best Regards,

Intel LAD OEM Product Marketing Team
