QUICKGUIDE: HOW TO INSTALL MX TURBOFLASH UTILITY?

MX Technology has released MX TurboFlash utility version 3.01.15 for the MX-GX Series Flash Drive on 2/25. All users are recommended to install the utility to fine tune performance of their GX series pendrives!

WARNING: MX TurboFlash utility supports only MX-GX Series USB 3.0 flash drives!

EASY STEPS TO INSTALL MX-Technology MX-TurboFlash utility for MX-GX series pendrives:

1. Download firmware upgrade utility: MX_TurboFlash_Setup_ver_3.01.15
2. Unzip MX_TurboFlash_Setup_ver_3.01.15.rar and right click on MX_TurboFlash_Setup_ver_3.01.15.exe, choose the language and install the utility on your computer. This launches the utility Setup Wizard

3. Double click on the INSTALL button and launch the utility.
4. Please after launching the utility unplug and plug your GX pendrive again as required.

5. Now you can choose between NORMAL und TURBO modes.

6. You can select TURBO mode to optimize performance of your GX pendrive depending on your customized system specifications.
