INTRODUCTION

«The Call of the Fireflies» is a puzzle-based singleplayer modification for Crysis.

Through mountains and dark caves, sleeping villages and frozen woods, on your weak legs, against the elements, follow the mysterious fireflies to their hive.

REQUIREMENTS

To play this mod, you need Crysis v1.2 installed.
Download the patch from these locations:

www.mycrysis.com/filebase.php

www.crymod.com/filebase.php

Please note that the Mod Loader doesn't work with this mod. See instructions on the next page.

ADVICES & HINTS

You'll find the gameplay quite barren down from the original game. Here are a few things that may be useful to know:

- As an elderly man, you cannot jump, sprint, crouch or swim, and won't survive a big fall.

- Water is your enemy. Cold affects you when you are wet after stepping into water. Being wet and cold for too long will result in death.

- Heavy wind affects you similarly, although the effects will vanish if you find shelter.

- The colder you get, the slower you will move.

- Staying in water will freeze you faster too.

- Get close to a fire to dry and heat back up. When your vision gets clear, you are dry.

- The fireflies are you guides, keep an eye out for them to spot important objects or paths.

- Watch your steps, falling will often be fatal.

- Explore your surroundings to find useful mechanisms, paths or objects.
